

## dLAN Highspeed Starter Kit Ethernet/ Ethernet

Plug in... to your home network!

**2 Highspeed HomePlug Ethernet adapters for 85Mbps PC networking & Internet access extension over your existing household power circuit**

- **dLAN\* Highspeed Starter Kit for 85Mbps PC networking & Internet access extension over your existing household power circuit (\*dLAN = Direct LAN)**
- **The easiest broadband and network extension into any room or onto any floor in the house, simply by connecting a dLAN Highspeed adapter to an ADSL/ cable/ modem/ router (Ethernet); and plugging it into a power socket! (No drivers to install)**
- **Installation? Child's play...**
- **Simply plug a dLAN Highspeed adapter into a power socket and connect it to your PC's Ethernet interface.**
- No new cables to lay, no drilling, no mess! - Just use any power socket throughout the house to access the Internet or home network – from the attic, cellar or garden shed!
- More PCs? - Just add more dLAN adapters for additional connectivity.
- Data rates of up to 85Mbps transfer rate over your existing household power circuit
- Stream videos in DVD quality over the power circuit throughout your home
- Supply every room in the house with IP-TV (Internet Television)
- Ranges of up to 200 metres – no problem with thick concrete walls and multi-floors
- Ideal for connecting games consoles to the Internet for Online Gaming
- Power saving mode – automatically switches to stand-by if not being used (30% saving on power consumption)
- Security from eavesdroppers with automatic DESpro encryption (Password protected)
- Fully compatible to HomePlug 1.0
- Wide support of operating systems: Ideal for Windows® 98, Windows® Me, Windows® 2000, Windows® XP, Mac OS X and Linux®
- 3 year warranty

The dLAN Highspeed Starter Kit is the first product to offer data transfers of up to 85 Mbps over your existing household power circuit. This new high-speed generation of devolo dLAN adapters now opens up a whole new range of possibilities. In addition to extending your existing broadband connection around the house, this latest standard ensures that PCs can exchange large files over the electricity mains without long delays, and even videos in DVD quality can be transferred over your household electricity circuit. In combination with IP-TV (Internet Protocol-TV), video on demand can be an impressive experience anywhere in the home, wherever there's a power socket! dLAN Highspeed adapters are highly secure, equipped with automatic DESpro encryption and are fully backwards compatible with the popular dLAN products currently supporting 14Mbps transfer rates. As dLAN adapters communicate over your existing electricity network, they are particularly well suited to old buildings and houses; dLAN adapters don't suffer from typical WLAN obstacles like thick walls and multi-floors.

## dLAN Highspeed Starter Kit Ethernet/ Ethernet

Plug in... to your home network!

Enjoy the benefits of the dLAN Highspeed Starter Kit:

- **85 Mbps high speeds!** The high-speed transfer rates of up to 85 Mbps now make it possible to transmit video or IP-TV in DVD quality, transfer large files or carry out heavy-weight data backups effortlessly across your existing household power circuit.
- **Fast Internet!** The dLAN Highspeed Starter Kit combined with an ADSL or Cable modem router can allow all networked PCs to easily surf the Internet together.
- **Easy Network Management!** The software utility Easyshare and the monitor program Informer offer you full control over the network's activities and infrastructure.
- **Substantial software package!** The package includes printed manuals along with virus and firewall programs from NORMAN.
- **Safe, secure and doesn't interfere!** HomePlug technology uses the household electricity meter as a natural barrier from eavesdroppers. Additional maximum security is provided using automatic DES<sub>pro</sub> encryption. Whereas thick walls and floors can cause severe interference for wireless connections (e.g. Wi-Fi™, Wireless LAN), the performance of HomePlug is unaffected. The exposure to electromagnetic waves for family at home, or for employees in the office is also reduced.
- **Meets the highest quality standards!** devolo products are all subjected to thorough German quality testing & assurance; therefore devolo assures optimal functionality with all leading operating systems, international specifications and protocols. **3 Year Warranty.**

### What is HomePlug and what are its advantages?

HomePlug technology uses your existing household power supply mains as a communications medium for data and media, allowing you to easily expand your network connectivity options without drilling or making a mess.

You can access the network from any electrical power socket anywhere in your house. Enjoy complete freedom in choosing the location of your home/ office and change it at any time you wish. Particularly well suited to old buildings and houses, dLAN adapters don't suffer from typical WLAN obstacles like thick walls and multi-floors.

The entire devolo dLAN® product family is compatible with the International HomePlug standard and can be flexibly combined to suit your individual requirements. There's no easier option for home networking!
